

# PRESERVING MEANING

Conservation and Transformation  
between Religion, Ethics, and Technology

## The Conference

“Preserving meaning” defines culture’s essential operation: gathering time into form, extending memory through transmission, shaping continuity through vigilance. The conference *Il senso serbato / Preserving Meaning* invites reflection on this dynamic across ritual, media, ecology, and technology. To preserve meaning is not to immobilize it, but to modulate temporality, generating duration and intelligibility. Religion, environment, and artificial intelligence reveal its contemporary ethical, aesthetic, and planetary dimensions.
